

Tailored Training. Expertly Delivered.

JETPUBS is your trusted partner in delivering aviation training materials and manual management solutions tailored to your specific fleet and operational needs. We offer a hands-on, collaborative approach -- freeing your team to focus on training and performance, not paperwork.

Custom Training Materials

Life-sized Wall Posters - Enhance the classroom training by adding a Life-Sized Poster on the classroom walls for each fleet type trained in the classroom. Used for referencing during ground school training. Recommendation: One set per fleet type per classroom.

Briefing Room Posters - Improve the pre- and post-flight training by adding Briefing Room Posters (smaller wall size) in each briefing/debriefing room for each specific type. Used for instructor and student reference, with procedures and systems schematics. Recommendation: One set per fleet type per briefing room, customized to the corresponding simulator cockpit.

Static Trainers - Optimize the training experience and save valuable simulator time by using our static trainer for cockpit familiarization, procedural training, and failure management training. Recommendation: Two per simulator, customized to the corresponding simulator cockpit.

Pilot-Sized Posters - Hand-out-sized posters for pilot to take notes, practice their flows, and continue to use for personal reference throughout training. Empower students to be readily prepared for their training by handing out Pilot Sized Posters. For pre- and post-flight practice for the students in their hotel room or at home. Recommendation: One per student, per class.

Customized Training Kits - Provide the students with a customized training kit that can include the FCOM, FCTM, QRH, posters, schematics, lights and switches guide, welcome guide/letter, and any other materials for students to be fully prepared for their training. Recommendation: One per student, per class type.

Digital Training Materials - Fleet-specific digital tools for use on iOS (iPhone and iPad).

“JETPUBS is incredibly responsive, which is crucial in helping us develop and maintain high-quality manuals.”

- Director of Regulatory Compliance

Why JETPUBS?

- In business since 2001, with a deep background in aviation
- Customized to your fleet
- Expert recommendations, no cookie cutter solutions
- Fast, responsive service
- iOS compatibility

Complete Manuals Services

All the best of a document management system, but with a full outsourced technical publications department to back you.

At JETPUBS, we partner with you to provide customized solutions to increase the safety and efficiency of your manuals. By combining the reset process, Online Manuals Service (OMS), and iPad App, we take care of the management of your manuals so you are able to spend more time on the line or in the air. We put you in charge of your manuals without putting you to work.

Online Manuals Service (OMS)

OMS has forever changed how manuals are maintained. Authors can quickly and easily mandate their own changes, track all communication, and shorten regulatory compliance from months to minutes. OMS improves the efficiency of your manual owners and authors by 40% and saves countless hours managing and verifying compliance.

Revisions Made Simple

Make a change to your manual

- Simply navigate to the section and document your changes.
- You focus on content while we manage formatting, standardization, spelling, and grammar.

Management approves your change

- Reviewers can easily see the differences between your changes and the original content.
- All communication regarding your change is tracked and archived, and if it affects another manual in your company, that manual owner is notified.

We apply the change to your manual

- JETPUBS makes your change and posts a proof back in OMS for your review.
- When it is time to close your revision, JETPUBS updates your manual's front matter, table of contents, and revision dates. The completed revision packet is then ready for you to review and publish.
